

Title: Joint Waste Solutions: Q2 2023-24 Budget and Finance Report

Author: Marco Arcangeli

Date: 14th December 2023

Introduction

This report sets out the position for Joint Waste Solutions as at quarter two and the projected outturn for the 2023-24 financial year.

Budget Update

Annex 1 shows the Contract Management Office (CMO) income and expenditure to the end of quarter two 2023-24. CMO year-end expenditure is projected to be £2,642,128 which when set against a combined annual budget and carry forward allocation of £2,642,190 represents an overall projected underspend for the year of £62.

Budget Variances

Budget variances from Annex 1 which have been considered material have been explained in more detail below.

CMO Variances

The Salaries budget is projecting a £26,591 overspend which is due to having to pay a fixed pension charge estimated to be £115,728 which was not included in this year's budget. This charge would normally be included in the budget as part of salary on-costs but due to an accounting oversight this was not accounted for. There are two elements to the contribution that partners should pay towards pension on-costs, a primary charge, and a fixed charge, but unfortunately only the primary charge was included in the budget.

Year	Pension Deficit	JWS share	Distributed Share (based on current agreed salary split)					
			SHBC	Elmbridge	Mole Valley	Woking	SCC	SEP
23/24	£976,000	£115,728	£17,308	£17,308	£17,308	£17,308	£22,162	£24,333

Expenditure against the Team budget is projected to be £22,050 lower than budgeted. This is mainly from reduced spending on training and travel budgets. Expenditure on parking has also greatly reduced because working from home has cut down the number of parking spaces needed at Dukes Court.

Contract Variances

The Core contract budget is projecting an underspend of £409,903. This is because the budget approved by members in November 2022 for 2023-24 included an estimated 10% inflationary uplift, which is more than the final figure of 6.85% from January 2023.

The Variable contract budget is affected by the same lower than budgeted inflation figure and is projecting an underspend of £78,206.

Indexation

The rate of uplift to be applied from 1st April this year has still not been agreed. When the calculation is performed in the usual way the uplift is 6.85%, however, Amey is trying to change the way the calculation is done and has so far produced two different uplift figures, 7.2% and 7.28%. The first of these was calculated using an out-of-date labour index. Amey's second attempt used labour indices that were not published by the Office for National Statistics until 16th May 2023. This is not in line with paragraph 10.2 of schedule 7 of the joint contract which states that the indexation adjustment must be applied on the first day of April. Amey has proposed holding a meeting to discuss this further, which JWS has agreed to. However as yet no dates for the meeting have been offered by Amey.

Recommendation

The Committee is asked to note the report.
