

SURREY HEATH BOROUGH COUNCIL
LOCAL DEVELOPMENT FRAMEWORK 2006-2027

**Designation of Local Heritage Assets
Supplementary Planning Document**

**Regulation 17 Consultation Draft
May 2011**

Great Place • Great Community • Great Future

Foreword

This document is the first formal stage in the preparation of the Designation of Local Heritage Assets Supplementary Planning Document (SPD) and will form part of the Surrey Heath Local Development Framework 2011-2028. The document is being prepared in accordance with Regulation 17 of the Town and Country Planning (Local Development) (England) Regulations 2004 (as amended).

The SPD sets out the criteria and survey methodology for assessing potential Local Heritage Assets for inclusion on the Council's Local List.

Comments received on this document will be used to inform the preparation of the final version of the SPD. We invite comments on all elements of the draft SPD.

Any comments you wish to make should be sent to the following email address:

Appendix 1	SHBC List of Local Heritage Assets.....	11
Appendix 2	SHBC List of Statutory Designated Heritage Assets	18

1. Introduction

- 1.1 The statutory list of buildings of special architectural or historical interest is defined with reference to standards of national significance and pays no regard to the local character, history and architecture of individual areas. Emphasis is very strongly in favour of buildings constructed before 1840.
- 1.2 Within Surrey Heath, there are many buildings and structures that may not meet the criteria for nationally listed buildings at present but do add to the cultural heritage of the Borough. Much of the historic development, particularly at the western end of the Borough, took place during the Victorian period. The result is that many fine buildings and structures that represent the early growth of areas like Camberley are unprotected by the statutory listing process. Consequently, from 1989 onwards Surrey Heath Borough Council has established and compiled a list of 'Structures of Local Significance' which have local architectural or historic significance and are deemed worthy of retention.

Image 1 Milestone, Bagshot

- 1.3 There are currently 205 recognised Local Heritage Assets in Surrey Heath which contribute greatly to the local character of the Borough and should be protected or retained whenever possible. The purpose of this SPD is to provide the methodology and criteria for identification of buildings, structures and sites of local importance for inclusion in support of policy DM17 and supporting text of the Core Strategy and Development Management Policies DPD (CS&DM DPD). Prior to the adoption of the CS&DM DPD, the SPD will support policy HE10 of the Surrey Heath Local Plan 2000 (Saved Policies).

2. Policy Background

National

PPS 5: Planning for the Historic Environment

A heritage asset is defined as a building, monument, site, place, area or landscape positively identified as having a degree of significance meriting consideration in planning decisions. Heritage assets are the valued components of the historic environment. They include designated heritage assets and assets identified by the local planning authority during the process of decision-making or through the plan-making process (including local listing).

The difference between a heritage asset and other components of the environment is that a heritage asset holds meaning for society over and above its functional utility. It is this heritage significance that justifies a degree of protection in planning decisions.

In addition to the national and statutory designations, local authorities may formally identify heritage assets that are important to the area. Though lacking the statutory protection of other designations, formal identification by the local authority through these processes is material in planning decisions.

Local

Surrey Heath Local Plan 2000 (Saved Policies)

Policy HE10: Structures of Local Significance

The Borough Council will maintain a list of structures which it considers to be of local architectural or historic significance. The list is to be reviewed periodically with a view to amendments or alterations. The Borough Council will seek to retain and preserve the stock of structures on the local list and will apply the following criteria in relation to proposals affecting them:

- a) Works of repair, alterations and additions to structures of local significance should be sympathetic to, and in character with, the structure; and*
- b) Alterations and additions to structures of local significance or development within their curtilage should not detract from the character or setting of the building concerned, particularly with regard to its surrounding gardens, landscape, street scene or relationship to adjoining buildings or significant views.*

Core Strategy and Development Management Policies DPD

Policy DM17: Heritage

Development which affects any Heritage Asset should first establish and take account of its individual significance, and seek to promote the conservation and enhancement of the Asset and its setting. In determining proposals for development affecting Heritage Assets or their setting, regard will be had as to whether the Asset is a Designated Heritage Asset or a Local Heritage Asset in determining whether the impact of any proposed development is acceptable.

Within Areas of High Archaeological Potential, as identified on the proposals map, or outside of these areas on any major development site of 0.4ha or greater, applicants are required to undertake prior assessment of the possible archaeological significance of the site and the implications of their proposals, and may be required to submit, as a minimum, a desk-based assessment to accompany any application. Where desk-based assessment suggests the likelihood of archaeological remains, the Planning Authority will require the results of an archaeological evaluation in order to inform the determination of the application.

The Borough Council will from time to time review the Heritage Assets included on the Local Lists, with regard to the Historic Environment Record, in consultation with Surrey County Council.

3. Proposed Criteria for Assessment

- 3.1 These criteria refer to Local Heritage Assets¹ i.e. those assets identified by the Local Planning Authority which make a special contribution to the history, appearance, character and cultural value of Surrey Heath. Focus is on local rather than national significance. Only those assets that survive in a clearly recognisable form, with their historic features and layouts still present, will be chosen.
- 3.2 The following criteria are suggested for guidance:-
- a) Pre 1700: All buildings which retain evidence of style, form, construction. (It is likely that these buildings would be on the statutory list already, any found to fall in this category should be proposed for statutory listing)
 - b) 1700-1840: All buildings where style, form and construction are still evident or able to be restored. (The best of these buildings would again be likely to be listed already and would be candidates for statutory listing)
 - c) Structures between 1840-1914 that are of definite quality and character. Selection is necessary to ensure poor examples are not included. Examples of "local styles" will be particularly relevant.
 - d) Between 1914-1939, only structures of particular quality and character will be considered. The selection should include particularly fine examples of the contemporary architectural styles and the principal works of any notable local architects.
 - e) After 1939 only outstanding structures that represent a particular architectural style will be considered.
- 3.3 Other features that need to be taken into account:
- a) Significant internal features where known.
 - b) Significant local historic or community associations – particular architect of regional or local note, historic associations, certain types of structure with specific community significance (schools, village halls, places of worship etc.)
 - c) Examples of Artistic Innovation
 - d) Example of new or emerging technology
 - e) Group value – structures can be included for their group value if the structure is of marginal quality but has its significance enhanced due to its proximity to other good structures or to some formal planning layout of historic significance.
 - f) Has it qualities of age, style, materials or any other characteristics which reflect those of at least a substantial number of buildings in the conservation area?
 - g) Does it relate by age, materials or in any other historically significant way to adjacent listed buildings, and contribute positively to their setting?
 - h) Does it individually, or as part of a group, serve as a reminder of the gradual development of the settlement in which it stands, or of an earlier phase of growth?
 - i) Does it have significant historic association with established features such as the road layout, burgage plots, a town park, or a landscape feature?

¹ It should be noted that for the purposes of this SPD, Local Heritage Assets only refer to buildings and structures and do not include sites, places, areas or landscapes as defined in PPS5.

- j) Does the building have landmark quality, or contribute to the quality of recognisable spaces, including exteriors or open spaces with a complex of public buildings?
- k) Does it reflect the traditional functional character of, or former uses within, the area?
- l) Has it significant historic associations with local people or past events?
- m) Does its use contribute to the character or appearance of the conservation area?
- n) If a structure associated with a designated landscape within the conservation area, such as a significant wall, terracing or a minor garden building, is it of identifiable importance to the historic design?

4. Survey Methodology

- 4.1 The standard pro forma for survey purposes will need to detail the following information and each record will require visual documentation.

Reference Number (for internal filing purposes)

Address/Location of Asset

Established Date of Origin (including phases of development)

Description

- Building Typology
- External Appearance (materials/architectural details)
- Wider context

Local Significance

- Justification for inclusion as determined against the criteria within this SPD

Group Value

- Yes/No (If yes, extent of group should be documented and mapped)

5. Identified Local Heritage Assets

- 5.1 Any planning proposals affecting Local Heritage Assets as defined on the Council's Local Heritage Asset List will need to give consideration to the policies outlined in PPS5: Planning for the Historic Environment. Of particular relevance to Local Heritage Assets are policies HE6 – HE8. An accompanying Practice Guide entitled *PPS5 Planning for the Historic Environment: Historic Environment Planning Practice Guide*² provides further information for applicants.

- 5.2 Applicants will also need to give consideration to Policy HE10 (Structures of Local Significance) of the Surrey Heath Local Plan 2000 (Saved Policies 2007). On adoption of the Core Strategy and Development Management Policies DPD, consideration will need to be given to Policy DM17 (Heritage).
