Item 6 - Questions from Members of the Public

In accordance with Part 4 Section E of the Council's Constitution, Jane Sherrard-Smith has asked the following question:

“With the recent proliferation of masts and antennae within this borough and the embracing of the telecommunications industry campaigns promoting the unstudied 5G wireless technology, to what extent is the Council considering involvement from all sections of the community, prior to the 5G roll-out?”

The Leader has provided the following response:

“The Council notes your concerns, however the Council has not been responsible for any of the projects rolled out to date and it is for those organisations currently involved to explain to the public what is being done and address any concerns. In the event that the Council should decide to undertake a project involving these technologies that will be a matter for Councillors to agree and thus there will be an opportunity to consider public involvement at that time.”
