Dear Louise,

Enterprise M3 LEP is pleased to be able to give its support to Surrey Heath Borough Council for the 5G Retail Testbed Project proposed in Camberley. As the Local Enterprise Partnership for Surrey and Hampshire, we recognise the importance of working toward a step-change in 5G in the region.

This project is original, innovative and looks to work toward solving real challenges in a global shift in the retail industry. We, therefore, believe this project to have significant national and international appeal.

We look forward to working with Surrey Heath Borough Council and its consortium partners on this exciting experimentation and commercialisation of 5G technology.

Yours Sincerely,

A yellow rectangular box redacting the signature of Rachel Barker.

Rachel Barker
