

Treasury Management Strategy Report 2021/22

Summary

Report to Executive to consider and recommend to Council the Treasury Strategy for 2021/22

Portfolio - Finance

Date Portfolio Holder signed off report: 2 February 2021

Wards Affected - All

Recommendation

The Executive is advised RECOMMEND to Council the adoption of the following:

- (i) The Treasury Management Strategy for 2021/22.**
- (ii) The Treasury Management Indicators for 2021/22 at Annex C.**
- (iii) The Minimum Revenue Provision policy statement and estimated minimum revenue provision payment table at Annex F.**
- (iv) The Treasury Management Policy Statement at Annex G**

Resource Implications

1. The budget for investment income in 2021/22 is £75,000 based on an average investment portfolio of £31 million at an interest rate of 0.25%. The budget for debt interest paid in 2021/22 is £2.5 million, based on an average debt portfolio of £174 million at an average interest rate of 1.43%. If actual levels of investments and borrowing, or actual interest rates, differ from those forecast, performance against budget will be correspondingly different.
2. Where investment income exceeds budget, e.g. from higher risk investments including pooled funds, or debt interest paid falls below budget, e.g. from cheap short-term borrowing, then the revenue savings will be transferred to the Interest Equalisation reserve to cover the risk of capital losses or higher interest rates payable in future years.
3. Funding for the proposed corporate capital programme for 2021/22 – 2023/24 will be funded by capital receipts, capital reserves and government grants.
4. Any changes required to the approved treasury management indicators and strategy, say due to changes in economic conditions, will be reflected in future reports for Executive and Full Council to consider.

Key Issues

5. Treasury management is the management of the Council's cash flows, borrowing and investments, and the associated risks. The Council has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of financial risk is therefore central to the Council's prudent financial management.
6. The Council's portfolio of investments comprise funds available for longer term investment and short term investments sufficient to meet cash flow requirements.
7. Treasury risk management at the Council is conducted within the framework of the Chartered Institute of Public Finance and Accountancy's Treasury Management in the Public Services: Code of Practice 2017 Edition (the CIPFA Code) which requires the Council to approve a treasury management strategy before the start of each financial year. This report fulfils the Council's legal obligation under the Local Government Act 2003 to have regard to the CIPFA Code.
8. Investments held for service purposes or for commercial profit are considered in the Investment Strategy which is on this agenda.
9. In accordance with the MHCLG Guidance, the Council will be asked to approve a revised Treasury Management Strategy Statement should the assumptions on which this report is based change significantly. Such circumstances would include, for example, a large unexpected change in interest rates, or in the Council's capital programme or in the level of its investment balance.

Options

10. The Executive can receive or amend the report, or ask for further information.
11. The Executive can approve or amend the proposed recommendations to Council.

Proposals

12. The Executive is asked to approve and recommend the Council the adoption of:
 - a) The Treasury Management Strategy for 2021/22
 - b) The Treasury Management Indicators for 2021/22 at Annex C
 - c) The Minimum Revenue Provision (MRP) Policy Statement at Annex F
 - d) The Treasury Management Policy Statement at Annex G

Supporting Information

National and International Factors which influence the Council's Treasury Strategy

13. The Council's treasury management advisors, Arlingclose Limited have provided us their assessment of the wider external factors that the Council's investment

strategy needs to take in to account in terms of the economy, interest rates and credit outlook. This is set out below:

Economic background:

14. The impact on the UK from coronavirus, together with its exit from the European Union and future trading arrangements with the bloc, will remain a major influence on the Council's treasury management strategy for 2021/22.
15. The Bank of England (BoE) maintained Bank Rate at 0.10% in November 2020 and also extended its Quantitative Easing programme by £150 billion to £895 billion. The Monetary Policy Committee voted unanimously for both, but no mention was made of the potential future use of negative interest rates. Within the latest forecasts, the Bank expects the UK economy to shrink -2% in Q4 2020 before growing by 7.25% in 2021, lower than the previous forecast of 9%. The BoE also forecasts the economy will now take until Q1 2022 to reach its pre-pandemic level rather than the end of 2021 as previously forecast.
16. UK Consumer Price Inflation (CPI) for September 2020 registered 0.5% year on year, up from 0.2% in the previous month. Core inflation, which excludes the more volatile components, rose to 1.3% from 0.9%. The most recent labour market data for the three months to August 2020 showed the unemployment rate rose to 4.5% while the employment rate fell to 75.6%. Both measures are expected to deteriorate further due to the ongoing impact of coronavirus on the jobs market, particularly when the various government job retention schemes start to be unwound in 2021, with the BoE forecasting unemployment will peak at 7.75% in Q2 2021. In August, the headline 3-month average annual growth rate for wages were 0% for total pay and 0.8% for regular pay. In real terms, after adjusting for inflation, total pay growth fell by -0.8% while regular pay was up 0.1%.
17. GDP growth fell by -19.8% in the second quarter of 2020, a much sharper contraction from -2.0% in the previous three months, with the annual rate falling -21.5% from -1.6%. All sectors fell quarter-on-quarter, with dramatic declines in construction (-35.7%), services (-19.2%) and production (-16.3%), and a more modest fall in agriculture (-5.9%). Monthly GDP estimates have shown the economy is recovering but remains well below its pre-pandemic peak. Looking ahead, the BoE's November Monetary Policy Report forecasts economic growth will rise in 2021 with GDP reaching 11% in Q4 2021, 3.1% in Q4 2022 and 1.6% in Q4 2023.
18. GDP growth in the euro zone rebounded by 12.7% in Q3 2020 after contracting by -3.7% and -11.8% in the first and second quarters, respectively. Headline inflation, however, remains extremely weak, registering -0.3% year-on-year in October, the third successive month of deflation. Core inflation registered 0.2% y/y, well below the European Central Bank's (ECB) target of 'below, but close to 2%'. The ECB is expected to continue holding its main interest rate of 0% and deposit facility rate of -0.5% for some time with further monetary stimulus expected later in 2020.

19. The US economy contracted at an annualised rate of 31.7% in Q2 2020 and then rebounded by 33.1% in Q3. The Federal Reserve maintained the Fed Funds rate at between 0% and 0.25% and announced a change to its inflation targeting regime to a more flexible form of average targeting. The Fed also provided strong indications that interest rates are unlikely to change from current levels over the next three years.
20. Former vice-president Joe Biden won the 2020 US presidential election. Mr Biden is making tackling coronavirus his immediate priority and will also be reversing several executive orders signed by his predecessor and take the US back into the Paris climate accord and the World Health Organization.

Credit Outlook:

21. After spiking in late March as coronavirus became a global pandemic, credit default swap (CDS) prices for the larger UK banks have steadily fallen back to almost pre-pandemic levels. Although uncertainly around COVID-19 related loan defaults lead to banks provisioning billions for potential losses in the first half of 2020, drastically reducing profits, reported impairments for Q3 were much reduced in some institutions. However, general bank profitability in 2020 is likely to be significantly lower than in previous years.
22. The credit ratings for many UK institutions were downgraded on the back of downgrades to the sovereign rating. Credit conditions more generally though in banks and building societies have tended to be relatively benign, despite the impact of the pandemic.
23. Looking forward, the potential for bank losses to be greater than expected when government and central bank support starts to be removed remains a risk, as does the UK not achieving a Brexit deal, suggesting a cautious approach to bank deposits in 2021/22 remains advisable.

Interest rate forecast:

24. The Council's treasury management adviser Arlingclose is forecasting that BoE Bank Rate will remain at 0.1% until at least the end of 2023. The risks to this forecast are judged to be to the downside as the BoE and UK government continue to react to the coronavirus pandemic and the Brexit transition period ends. The BoE extended its asset purchase programme to £895 billion in November while keeping Bank Rate on hold. However, further interest rate cuts to zero, or possibly negative, cannot yet be ruled out but this is not part of the Arlingclose central forecast.
25. Gilt yields are expected to remain very low in the medium-term while short-term yields are likely remain below or at zero until such time as the BoE expressly rules out the chance of negative interest rates or growth/inflation prospects improve. The central case is for 10-year and 20-year to rise to around 0.5% and 0.75% respectively over the time horizon. The risks around the gilt yield forecasts are judged to be broadly balanced between upside and downside risks, but there

will almost certainly be short-term volatility due to economic and political uncertainty and events.

26. A more detailed economic and interest rate forecast provided by Arlingclose is attached at Appendix A.
27. For the purpose of setting the budget, it has been assumed that no new treasury management investments will be made and that existing loans will be financed at an average rate of 2%.

Local Context

28. On 30th November 2020, the Council held £174 million of borrowing and £30 million of treasury investments.
29. The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while usable reserves and working capital are the underlying resources available for investment. The Council's current strategy is to maintain borrowing below their underlying levels, sometimes known as internal borrowing subject to holding a minimum of £5 million.

Borrowing Strategy

30. The Council currently holds £174 million of loans, which it is using to fund its property acquisitions. The Council may borrow in advance to pre-fund future years' requirements, providing this does not exceed the authorised limit for borrowing of £235 million however the Council will incur a cost of carry until the funds are utilised.

Objectives:

31. The Council's main objective when borrowing money is to strike an appropriately low risk balance between securing low interest costs and achieving certainty of those costs over the period for which funds are required. The flexibility to renegotiate loans should the Council's long-term plans change is a secondary objective.

Strategy:

32. Given the significant cuts to public expenditure and in particular to local government funding, the Council's borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio. With short-term interest rates currently much lower than long-term rates, it is likely to continue to be more cost effective in the short-term to either use internal resources, or to borrow short-term loans instead.
33. By doing so, the Council is able to reduce net borrowing costs (despite foregone investment income) and reduce overall treasury risk. The benefits of short-term borrowing will be monitored regularly against the potential for incurring additional

costs by deferring borrowing into future years when long-term borrowing rates are forecast to rise modestly. Arlingclose will assist the Authority with this 'cost of carry' and breakeven analysis. Its output may determine whether the Authority borrows additional sums at long-term fixed rates in 2021/22 with a view to keeping future interest costs low, even if this causes additional cost in the short-term.

34. The Council has previously raised the majority of its long-term borrowing from the PWLB but will consider long-term loans from other sources including banks, pensions and local authorities, and will investigate the possibility of issuing bonds and similar instruments, in order to lower interest costs and reduce over-reliance on one source of funding in line with the CIPFA Code. PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield; the Authority intends to avoid this activity in order to retain its access to PWLB loans.
35. Alternatively, the Authority may arrange forward starting loans, where the interest rate is fixed in advance, but the cash is received in later years. This would enable certainty of cost to be achieved without suffering a cost of carry in the intervening period.
36. In addition, the Authority may borrow further short-term loans to cover unplanned cash flow shortages.
37. In order to manage risk on its short term borrowings, the Council has arranged fixed rate forward starting loans for £50m. These will replace the short term borrowing of the same amount and are due to start in 2021 and 2022. This has enabled certainty of cost to be achieved in the future whilst taking advantage of low interest rates in the short term.

Sources of borrowing:

38. The approved sources of long-term and short-term borrowing are:
 - HM Treasury's PWLB lending facility (formerly the Public Works Loan Board)
 - Any institution approved for investments (see below)
 - Any other bank or building society authorised to operate in the UK
 - UK public and private sector pension funds (except Surrey County Council Pension Fund)
 - UK Municipal Bonds Agency plc and other special purpose companies created to enable local Council bond issues
 - Local Enterprise Partnerships
 - Any other UK public sector body

In addition, capital finance may be raised by the following methods that are not borrowing, but may be classed as other debt liabilities:

- Leasing
- Hire Purchase

- Private Finance Initiative
- Sale and Leaseback

Municipal Bonds Agency:

39. UK Municipal Bonds Agency plc was established in 2014 by the Local Government Association as an alternative to the PWLB. It issues bonds on the capital markets and lends the proceeds to local authorities. This is a more complicated source of finance than the PWLB for two reasons: borrowing authorities will be required to provide bond investors with a guarantee to refund their investment in the event that the agency is unable to for any reason; and there will be a lead time of several months between committing to borrow and knowing the interest rate payable. Any decision to borrow from the Agency will require the approval of Full Council and therefore a separate report would be required.

Short term and Variable Rate loans:

40. These loans leave the Council exposed to the risk of short term interest rate rises and are therefore subject to the interest rate exposure limits in the treasury management indicators below. Financial derivatives may be used to manage this interest rate risk (see section below)

Debt Rescheduling:

41. The PWLB allows authorities to repay loans before maturity and either pay a premium or receive a discount according to a set formula based on current interest rates. Other lenders may also be prepared to negotiate premature redemption terms. The Council may take advantage of this and replace some loans with new loans, or repay loans without replacement, where this is expected to lead to an overall cost saving or a reduction in risk.

Annual Minimum Revenue Provision (MRP) Statement:

42. When a Council borrows, it is required to indicate how it intends to fulfil its duty to make prudent provision for the repayment of the capital borrowed from revenue. This provision is called the Minimum Revenue Provision or MRP. Best practice guidance recommends that Authorities prepare a statement of policy on making MRP in respect of the forthcoming financial year. The Council's MRP statement will be recommended to Council by the Executive on 16th February 2021 as part of the Capital budget for 2021/22.
43. The recommended policy is attached in Annex F and the forecast MRP is £m is shown in the table below:

	2019/20 actual	2020/21 forecast	2021/22 budget	2022/23 budget	2023/24 budget
MRP Payment	2158	2213	2274	2320	2378

Treasury Investment Strategy

44. The Council holds invested funds, representing income received in advance of expenditure plus balances and reserves held. This is expected to remain at £14 million in 2021/22.

Objectives:

45. The CIPFA Code requires the Council to invest its treasury funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest return of return, or yield. The Council's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income. Where balances are expected to be invested for more than one year, the Council will aim to achieve a total return that is equal or higher than the prevailing rate of inflation, in order to maintain the spending power of the sum invested.

Negative Interest Rates:

46. The COVID-19 pandemic has increased the risk that the Bank of England will set its Bank Rate at or below zero, which is likely to feed through to negative interest rates on all low risk, short-term investment options. Since investments cannot pay negative income, negative rates will be applied by reducing the value of investments. In this event, security will be measured as receiving the contractually agreed amount at maturity, even though this may be less than the amount originally invested.

Strategy:

47. Given the increasing risk and very low returns from short-term unsecured bank investments, the majority of the Council's surplus cash is currently invested in money market funds and the UK Government. On the advice of our advisors Arlingclose. No changes are proposed to the 2021/22 investment strategy from that adopted in 2020/21.

Business Models:

48. Under the new IFRS 9 standard, the accounting for certain investments depends on the Council's "business model" for managing them. The Council aims to achieve value from its internally managed treasury investments by a business model of collecting the contractual cash flows and therefore, where other criteria

are also met, these investments will continue to be accounted for at amortised cost.

Approved Counterparties:

49. The Council's Treasury advisors have advised that the Council may invest its surplus funds with any of the counterparty types in the table below, subject to the limits shown.

Sector	Time limit	Counterparty limit	Sector limit
The UK Government	50 years	Unlimited	n/a
Local authorities & other government entities	25 years	£3m	Unlimited
Secured investments *	25 years	£3m	Unlimited
Banks (unsecured) *	13 months	£2m	Unlimited
Building societies (unsecured) *	13 months	£2m	£5m
Registered providers (unsecured) *	5 years	£2m	£5m
Money market funds *	n/a	£5m	Unlimited
Strategic pooled funds	n/a	£3m	£5m
Real estate investment trusts	n/a	£3m	£?m
Other investments *	5 years	£2m	£?m

This table must be read in conjunction with the notes below.

* Minimum Credit Rating:

50. Treasury investments in the sectors marked with an asterisk will only be made with entities whose lowest published long-term credit rating is no lower than A. Where available, the credit rating relevant to the specific investment or class of investment is used, otherwise the counterparty credit rating is used. However, investment decisions are never made solely based on credit ratings, and all other relevant factors including external advice will be taken into account.
51. For entities without published credit ratings, investments may be made either (a) where external advice indicates the entity to be of similar credit quality; or (b) to a maximum of £2m per counterparty as part of a diversified pool e.g. via a peer-to-peer platform.

Banks and Building Societies (unsecured):

52. Accounts, deposits, certificates of deposit and senior unsecured bonds with banks and building societies, other than multilateral development banks. These investments are subject to the risk of credit loss via a bail-in should the regulator determine that the bank is failing or likely to fail. See below for arrangements relating to operational bank accounts.

Secured Investments:

53. Investments secured on the borrower's assets, which limits the potential losses in the event of insolvency. The amount and quality of the security will be a key factor in the investment decision. Covered bonds and reverse repurchase agreements with banks and building societies are exempt from bail-in. Where there is no investment specific credit rating, but the collateral upon which the investment is secured has a credit rating, the higher of the collateral credit rating and the counterparty credit rating will be used. The combined secured and unsecured investments with any one counterparty will not exceed the cash limit for secured investments.

Government:

54. Loans to, and bonds and bills issued or guaranteed by, national governments, regional and local authorities and multilateral development banks. These investments are not subject to bail-in, and there is generally a lower risk of insolvency, although they are not zero risk. Investments with the UK Government are deemed to be zero credit risk due to its ability to create additional currency and therefore may be made in unlimited amounts for up to 50 years.

Registered Providers (unsecured):

55. Loans to, and bonds issued or guaranteed by, registered providers of social housing or registered social landlords, formerly known as housing associations. These bodies are regulated by the Regulator of Social Housing (in England), the Scottish Housing Regulator, the Welsh Government and the Department for Communities (in Northern Ireland). As providers of public services, they retain the likelihood of receiving government support if needed.

Money Market Funds:

56. Pooled funds that offer same-day or short notice liquidity and very low or no price volatility by investing in short-term money markets. They have the advantage over bank accounts of providing wide diversification of investment risks, coupled with the services of a professional fund manager in return for a small fee. Although no sector limit applies to money market funds, the Council will take care to diversify its liquid investments over a variety of providers to ensure access to cash at all times.

Strategic Pooled Funds:

57. Bond, equity and property funds that offer enhanced returns over the longer term, but are more volatile in the short term. These allow the Council to diversify into asset classes other than cash without the need to own and manage the underlying investments. Because these funds have no defined maturity date, but are available for withdrawal after a notice period, their performance and continued suitability in meeting the Council's investment objectives will be monitored regularly.

Real Estate Investment Trusts:

58. Shares in companies that invest mainly in real estate and pay the majority of their rental income to investors in a similar manner to pooled property funds. As with property funds, REITs offer enhanced returns over the longer term, but are more volatile especially as the share price reflects changing demand for the shares as well as changes in the value of the underlying properties.

Other Investments:

59. This category covers treasury investments not listed above, for example unsecured corporate bonds and company loans. Non-bank companies cannot be bailed-in but can become insolvent placing the Council's investment at risk.

Operational Bank Accounts:

60. The Council may incur operational exposures, for example through current accounts, collection accounts and merchant acquiring services, to any UK bank with credit ratings no lower than BBB- and with assets greater than £25 billion. These are not classed as investments, but are still subject to the risk of a bank bail-in, and balances will therefore be kept below £3 million per bank. The Bank of England has stated that in the event of failure, banks with assets greater than £25 billion are more likely to be bailed-in than made insolvent, increasing the chance of the Council maintaining operational continuity. Deposits with the Council's current account are restricted to overnight deposits.

Risk Assessment and Credit Ratings

61. Credit ratings are obtained and monitored by the Council's treasury advisers, who will notify changes in ratings as they occur. The credit rating agencies in current use are listed in the Treasury Management Practices document. Where an entity has its credit rating downgraded so that it fails to meet the approved investment criteria then:
 - no new investments will be made,
 - any existing investments that can be recalled or sold at no cost will be, and
 - full consideration will be given to the recall or sale of all other existing investments with the affected counterparty.

62. Where a credit rating agency announces that a credit rating is on review for possible downgrade (also known as “negative watch”) so that it may fall below the approved rating criteria, then only investments that can be withdrawn on the next working day will be made with that organisation until the outcome of the review is announced. This policy will not apply to negative outlooks, which indicate a long-term direction of travel rather than an imminent change of rating.

Other Information on the Security of Investments:

63. The Council understands that credit ratings are good, but not perfect, predictors of investment default. Full regard will therefore be given to other available information on the credit quality of the organisations in which it invests, including credit default swap prices, financial statements, information on potential government support, reports in the quality financial press and analysis and advice from the Council’s treasury management adviser. No investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may otherwise meet the above criteria.
64. When deteriorating financial market conditions affect the creditworthiness of all organisations, as happened in 2008 and 2020, this is not generally reflected in credit ratings, but can be seen in other market measures. In these circumstances, the Council will restrict its investments to those organisations of higher credit quality and reduce the maximum duration of its investments to maintain the required level of security. The extent of these restrictions will be in line with prevailing financial market conditions. If these restrictions mean that insufficient commercial organisations of high credit quality are available to invest the Council’s cash balances, then the surplus will be deposited with the UK Government or with other local authorities. This will cause investment returns to fall but will protect the principal sum invested.

Investment Limits:

65. The maximum that will be lent to any one organisation (other than the UK Government) will be £3 million. A group of entities under the same ownership will be treated as a single organisation for limit purposes.
66. Credit risk exposures arising from non-treasury investments, financial derivatives and balances greater than £3 million in operational bank accounts count against the relevant investment limits.
67. Limits are also be placed on fund managers, investments in brokers’ nominee accounts and foreign countries as below. Investments in pooled funds and multilateral development banks do not count against the limit for any single foreign country, since the risk is diversified over many countries. Please refer to the table below:

	Cash limit
Any single organisation, except the UK Central Government	£3m each
UK Central Government	Unlimited
Any group of organisations under the same ownership	£3m per group
Any group of pooled funds under the same management	£5m per manager
Negotiable instruments held in a broker's nominee account	£10m per broker
Foreign countries	£2m per country
Registered Providers	£5m in total
Unsecured investments with Building Societies	£5m in total
Loans to unrated corporates	£2m in total
Money Market Funds	Unlimited

Liquidity Management:

68. The Council uses purpose-built cash flow forecasting software to determine the maximum period for which funds may prudently be committed. The forecast is compiled on a prudent basis to minimise the risk of the Council being forced to borrow on unfavourable terms to meet its financial commitments.
69. The Council will spread its liquid cash over at a number of providers (e.g. bank accounts and money market funds) to ensure that access to cash is maintained in the event of operational difficulties at any one provider.

Other Items

70. There are a number of additional items that the Council is obliged by CIPFA or MHCLG to include in its treasury management strategy. These are shown in Annex B.

Treasury Management Indicators

71. The Council measures and manages its exposures to treasury management risks using a range of indicators which members are asked to approve. These are set out at Annex C.

Corporate Objectives and Key Priorities

72. The Treasury Management supports the Council's Key Priority 2.

Policy Framework

73. The Council complies with the requirements of the CIPFA Code of Practice and Treasury Management. The current relevant criteria and constraints incorporated into the Treasury Management Policy Statement are:

- a. New borrowing is to be contained within the limits approved by the Council, in accordance with the CIPFA Prudential Code for Capital Finance in Local Authorities, and the Council's prudential indicators.
- b. Investments to be made in accordance with the CLG guidance on Local Council Investments, on the basis of Fitch, Moody's and Standard & Poors credit ratings for rated institutions and as detailed in the Treasury Management Policy statement and approved schedules and practices.
- c. Sufficient funds to be available to meet the Council's estimated outgoings for any day.
- d. Investment objectives are to maximise the return to the Council, subject to the overriding need to protect the capital sum.
- e. The Council's response to interest rate changes is to minimise the net interest rate burden on borrowing and maximise returns from investments, subject to (a-d) above.

Legal Issues

74. These are addressed in the report and relate to a requirement to set and agree both a treasury management strategy and prudential indicators.

Governance Issues

75. The recommendations address best practice and are required as part of the CIPFA code.

Sustainability

76. None

Risk Management

77. Poor returns on investments could lead to a reduction in income also to support the revenue budget. However, low returns on investments should mean low rates for borrowing which could offset any potential loss. There is a risk that variable interest rates on short term borrowing could rise faster than expected leading to an increase in cost and therefore leading to savings being needed elsewhere in the Council's budget.
78. The limits proposed in this report in respect to counterparties and investments are the overall limits for agreement by Council. However from time to time these may be tightened temporarily by the Executive Head of Finance in consultation with the portfolio holder for Resources to reflect increased uncertainty and increase in perceived risk in financial institutions and the economy. This will usually be at the cost of lower returns.

79. The investments ratings provided by credit ratings agencies are only a guide and do not give 100% security. There is always a risk that an institution may be unable to repay its loans whatever the credit rating thereby putting the Council's investments at risk.

Consultation

80. The Council's treasury advisors have been consulted and advised on the treasury strategy.

Officer Comments

81. Treasury Management, in particular the management of debt, is becoming an increasingly important area for the Council. This can lead to financial benefits but also carries risks which need to be clearly understood.

Arlingclose Economic & Interest Rate Forecast – November 2020

Underlying assumptions:

- The medium-term global economic outlook remains weak. Second waves of Covid cases have prompted more restrictive measures and further lockdowns in Europe and the UK. This ebb and flow of restrictions on normal activity will continue for the foreseeable future, at least until an effective vaccine is produced and importantly, distributed.
- The global central bank and government responses have been significant and are in many cases on-going, maintaining more stable financial, economic and social conditions than otherwise.
- Although these measures supported a sizeable economic recovery in Q3, the imposition of a second national lockdown in England during November will set growth back and likely lead to a fall in GDP in Q4.
- Signs of a slowing economic recovery were already evident in UK monthly GDP and PMI data, even before the latest restrictions. Despite some extension to fiscal support measures, unemployment is expected to rise when these eventually come to an end in mid-2021.
- This situation will result in central banks maintaining low interest rates for the medium term. In the UK, Brexit is a further complication. Bank Rate is therefore likely to remain at low levels for a very long time, with a distinct possibility of being cut to zero. Money markets continue to price in a chance of negative Bank Rate.
- Longer-term yields will also remain depressed, anchored by low central bank policy rates, expectations for potentially even lower rates and insipid inflation expectations. There is a chance yields may follow a slightly different path in the medium term, depending on investor perceptions of growth and inflation, the development of a vaccine or if the UK leaves the EU without a deal.

Forecast:

- Arlingclose expects Bank Rate to remain at the current 0.10% level.
- Additional monetary loosening through increased financial asset purchases was delivered as we expected. Our central case for Bank Rate is no change, but further cuts to zero, or perhaps even into negative territory, cannot be completely ruled out.
- Gilt yields will remain low in the medium term. Shorter term gilt yields are currently negative and will remain around zero or below until either the Bank expressly rules out negative Bank Rate or growth/inflation prospects improve.
- Downside risks remain in the near term, as the government continues to react to the escalation in infection rates and the Brexit transition period comes to an end.

Other Items

There are a number of additional items that the Council is obliged by CIPFA or MHCLG to include in its Treasury Management Strategy.

1. Financial Derivatives

Local authorities have previously made use of financial derivatives embedded into loans and investments both to reduce interest rate risk (e.g. interest rate collars and forward deals) and to reduce costs or increase income at the expense of greater risk (e.g. LOBO loans and callable deposits). The general power of competence in Section 1 of the Localism Act 2011 removes much of the uncertainty over local authorities' use of standalone financial derivatives (i.e. those that are not embedded into a loan or investment).

The Council will only use standalone financial derivatives (such as swaps, forwards, futures and options) where they can be clearly demonstrated to reduce the overall level of the financial risks that the Council is exposed to. Additional risks presented, such as credit exposure to derivative counterparties, will be taken into account when determining the overall level of risk. Embedded derivatives, including those present in pooled funds and forward starting transactions, will not be subject to this policy, although the risks they present will be managed in line with the overall treasury risk management strategy.

Financial derivative transactions may be arranged with any organisation that meets the approved investment criteria, assessed using the appropriate credit rating for derivative exposures. An allowance for credit risk calculated using the methodology in the Treasury Management Practices document will count against the counterparty credit limit and the relevant foreign country limit.

In line with the CIPFA Code, the Council will seek external advice and will consider that advice before entering into financial derivatives to ensure that it fully understands the implications.

At the moment the Council does not hold any Financial Derivatives.

2. Investment Advisers

The Council has appointed Arlingclose Limited as treasury management advisers and receives specific advice on investment, debt and capital finance issues. This is monitored by holding regular meetings with the advisers to ensure that they continue to meet the Council's treasury management objectives. In addition, the Council's tender process for treasury management advice ensures value for money.

3. Investment of Money Borrowed in Advance of Need

The total amount borrowed will not exceed the authorised borrowing limit of £235 million. The maximum period between borrowing and expenditure is not expected to exceed two years, although the Council is not required to link particular loans with particular items of expenditure. At the moment there are no plans to borrow in advance.

Other Options Considered

The MHCLG Guidance and the CIPFA Code do not prescribe any particular treasury management strategy for local authorities to adopt. The Executive Head of Finance, having consulted the Portfolio Member, believes that the above strategy represents an appropriate balance between risk management and cost effectiveness. Some alternative strategies, with their financial and risk management implications, are listed below.

Alternative	Impact on income and expenditure	Impact on risk management
Invest in a narrower range of counterparties and/or for shorter times	Interest income will be lower	Lower chance of losses from credit related defaults, but any such losses may be greater
Invest in a wider range of counterparties and/or for longer times	Interest income will be higher	Increased risk of losses from credit related defaults, but any such losses may be smaller
Borrow additional sums at long-term fixed interest rates	Debt interest costs will rise; this is unlikely to be offset by higher investment income	Higher investment balance leading to a higher impact in the event of a default; however long-term interest costs may be more certain
Borrow short-term or variable loans instead of long-term fixed rates	Debt interest costs will initially be lower	Increases in debt interest costs will be broadly offset by rising investment income in the medium term, but long term costs may be less certain
Reduce level of borrowing	Saving on debt interest is likely to exceed lost investment income	Reduced investment balance leading to a lower impact in the event of a default; however long-term interest costs may be less certain

Markets in Financial Instruments Directive

The Council has opted up to professional client status with its providers of financial services, including advisers, banks, brokers and fund managers, allowing it access to a

greater range of services but without the greater regulatory protections afforded to individuals and small companies. Given the size and range of the Council's treasury management activities, The Executive Head of Finance believes this to be the most appropriate status.

Treasury Management Indicators 2021/22

The Council measures its exposure to treasury management risks using the following indicators. The Council is asked to approve these indicators:

1. Security – Average Credit Rating

The Council has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit rating of its investment portfolio.

Credit Risk Indicator	Target
Portfolio average credit rating	A

This is calculated by applying a score to each investment (AAA = 1, AA+=2, etc.) and taking the arithmetic average weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

2. Liquidity: cash available within three months

The Council has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount of cash available to meet unexpected payments within a rolling three month period, without additional borrowing.

Liquidity Risk Indicator	Target
Total cash available within 3 months	£5m

3. Interest Rate Exposures:

This indicator is set to control the Council's exposure to interest rate risk. The Council holds investments of £31 million and variable rate borrowing of £174 million as at the 30th November which equates to net borrowing of £143 million. The limit on one-year revenue impact of a 1% rise in interest rates has been set at £1 million. The Council has sufficient reserves in an Interest Equalisation Reserve to mitigate the impact of an interest rate rise for 2021/22.

The Council has also fixed £50 million of these loans which are due to start in 2020/21 at an average rate of 2.88% thereby reducing its interest rate exposure.

4. Maturity Structure of Borrowing:

This indicator is set to control the Council's exposure to refinancing risk. The upper and lower limits on the maturity structure of fixed rate borrowing will be:

Refinancing rate risk indicator	Upper	Lower
Not over 1 year	100%	0%
Over 1 but not over 2 years	100%	0%
Over 2 but not over 5 years	100%	0%
Over 5 but not over 10 years	100%	0%
Over 10 but not over 15 years	100%	0%
Over 15 but not over 20 years	100%	0%
Over 20 but not over 30 years	100%	0%
Over 25 but not over 30 years	100%	0%
Over 30 but not over 40 years	100%	0%
Over 40 years	100%	0%

Time periods start on the first day of each financial year. The maturity date of borrowing is the earliest date on which the lender can demand repayment. This table means there is total flexibility on borrowing periods to achieve the most cost effective option.

5. Principal Sums Invested for Periods Longer than a year:

The purpose of this indicator is to control the Council's exposure to the risk of incurring losses by seeking early repayment of its investments. The limits on the long-term principal sum invested to final maturities beyond the period end will be:

Price Risk Indicator	2021/22	2022/23	2023/24
Limit on principal invested beyond year end	£2.5m	£2.5m	£2.5m

Annex D

Other Pooled Funds	2.05	4.43%
Total Treasury Investments	30.92	0.90%
Net Debt	143.49	0.53%

Minimum Revenue Policy (MRP) Statement

1. The Secretary of State under section 21(1A) of the Local Government Act 2003 issued guidance on the calculation of MRP in February 2012 with 2012 being the first year of operation. The Council has assessed its method of MRP and is satisfied that the guidelines for its annual amount of MRP set out within this policy statement will result in its making the prudent provision that is required by the guidance.
2. For capital expenditure incurred and funded through borrowing the Council will calculate MRP using the asset life method as summarised in the table below. MRP will be based on the estimated life of the assets purchased by unsupported borrowing.

Estimated economic lives of assets	Estimated economic life
Asset Class	
Land and heritage assets	50 years
Buildings and services	50 years
Vehicles and Plant	10 years
IT equipment and software	5 years
Investment property	50 years
Assets for regeneration and/or under construction	0% until development complete

3. The Council will aim to minimise the impact of MRP on the General Fund by only acquiring assets with a longer rather than shorter economic life through borrowing.
4. In accordance with provisions in the guidance MRP will be charged starting in the year following the date an asset becomes operational.
5. The forecast MRP in £m is shown in the table below:

	2019/20 actual	2020/21 forecast	2021/22 budget	2022/23 budget	2023/24 budget
MRP Payment	2158	2213	2274	2320	2378

Note: The Council may need to amend to MRP policy dependent on Guidance from MHCLG. If this is the case it will be submitted to members again for approval at a later date

Treasury Management Policy Statement

The Council's financial regulations require it to create and maintain a treasury management policy statement, stating the policies, objectives and approach to risk management of its treasury activities, as a cornerstone for effective treasury management.

Definition

1. The Council defines its treasury management activities as: The management of the Council's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.

Risk management

2. This Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.

Value for money

3. This organisation acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.

Borrowing policy

4. The Council greatly values revenue budget stability. Short-term and variable rate loans will only be borrowed to the extent that they either offset short-term and variable rate investments or can be shown to produce revenue savings.
5. The Council will set an affordable borrowing limit each year in compliance with the Local Government Act 2003, and will have regard to the CIPFA Prudential Code for Capital Finance in Local Authorities when setting that limit. It will also set limits on its exposure to changes in interest rates and limits on the maturity structure of its borrowing in the treasury management strategy report each year.

Investment policy

6. The Council's primary objectives for the investment of its surplus funds are to protect the principal sums invested from loss, and to ensure adequate liquidity so that funds are available for expenditure when needed. The generation of investment income to support the provision of local Council services is an important, but secondary, objective.

7. The Council will have regard to the Communities and Local Government Guidance on Local Government Investments and will approve an investment strategy each year as part of the treasury management strategy. The strategy will set criteria to determine suitable organisations with which cash may be invested, limits on the maximum duration of such investments and limits on the amount of cash that may be invested with any one organisation.

Glossary of Terms

Amortising	A loan or bond where principal is repaid over its term, rather than only on maturity.
Annuity	A method of repaying a loan where the cash payment remains constant over the life of the loan, but the proportion of interest reduces and the proportion of principal repayment increases over time. Repayment mortgages and personal loans tend to be repaid by the annuity method.
Authorised limit	The maximum amount of debt that a local Council may legally hold, set annually in advance by the Council itself. One of the Prudential Indicators.
Bail-in	A method of rescuing a failing financial institution by cancelling some of its deposits and bonds. Investors may suffer a haircut but may be given shares in the bank as part compensation. See also bail-out.
Bail-out	A method of rescuing a failing financial institution by the injection of public money. This protects investors at the expense of taxpayers. See also bail-in.
Bank of England	The central bank of the UK, based in London, sometimes just called “the Bank”.
Bank Rate	The official interest rate set by the Monetary Policy Committee, and the rate of interest paid by the Bank of England on commercial bank deposits. Colloquially termed the “base rate”.
Borrowing	Usually refers to the stock of outstanding loans owed and bonds issued.
Building society	A mutual organisation that performs similar functions to a retail bank but is owned by its customers.
Call account	A deposit account that can be called back, normally on instant access.
Capital	(1) Long-term, as in capital expenditure and capital receipt. (2) Principal, as in capital gain and capital value. (3) Investments in financial institutions that will absorb losses before senior unsecured creditors.
Capital expenditure	Expenditure on the acquisition, creation or enhancement of fixed assets that are expected to provide value for longer

than one year, such as property and equipment, plus expenditure defined as capital in legislation such as the purchase of certain investments.

Capital finance	Arranging and managing the cash required to finance capital expenditure, and the associated accounting.
Capital finance Regulations	Legislation covering local authorities' activities in capital finance, treasury management and accounting. Separate regulations are published for the four nations of the UK.
Capital financing Requirement	A local Council's underlying need to hold debt for capital purposes, representing the cumulative capital expenditure that has been incurred but not yet financed. The CFR increases with capital expenditure and decreases with capital finance and MRP.
Capital gain or loss	An increase or decrease in the capital value of an investment, for example through movements in its market price.
CET1	Core equity tier 1 - the purest form of capital for a financial institution, which is available to absorb losses while it remains a going concern, usually expressed as a ratio to risk weighted assets.
Certainty rate	Discount on PWLB rates for new loans borrowed, available to all local authorities that provide a forecast for their borrowing requirements.
Certificate of deposit (CD)	A short-term debt instrument, similar to a deposit, but that is tradable on the money markets.
CIPFA	The Chartered Institute of Public Finance and Accountancy - the professional body for accountants working in the public sector. CIPFA also sets various standards for local government
Collective investment Scheme	Scheme in which multiple investors collectively hold units or shares. The investment assets in the fund are not held directly by each investor, but as part of a pool (hence these funds are also referred to as 'pooled funds').
Cost of carry	When a loan is borrowed in advance of need, the difference between the interest payable on the loan and the income earned from investing the cash in the interim.
Counterparty	The other party to a loan, investment or other contract.

Counterparty limit	The maximum amount an investor is willing to lend to a counterparty, in order to manage credit risk.
CPI	Consumer Price Index - the measure of inflation targeted by the Monetary Policy Committee, measured on a harmonised basis across the European Union.
Credit default swap (CDS)	Derivative for swapping credit risk on a particular issuer, similar to an insurance policy where the buyer pays a premium against the risk of default. Also used as an indicator of credit risk: the higher the premium, the higher the perceived risk.
Credit rating	Formal opinion by a credit rating agency of a counterparty's future ability to meet its financial obligations. As it is only an opinion, there is no guarantee that a highly rated organisation will not default.
Credit rating agency	An organisation that publishes credit ratings. The three largest agencies are Fitch, Moody's and Standard & Poor's but there are many smaller ones.
Credit risk	The risk that a counterparty will default on its financial obligations.
Debt	(1) A contract where one party owes money to another party, such as a loan, deposit or bond. Contrast with equity. (2) In the Prudential Code, the total outstanding borrowing plus other long-term liabilities.
Default	Failure to meet an obligation under a debt contract, including the repayment of cash or compliance with a covenant, usually as a result of being in financial difficulty (rather than an administrative oversight).
Deposit	A regulated placing of cash with a financial institution. Deposits are not tradable on financial markets.
Derivative	Financial instrument whose value is derived from an underlying instrument or index, such as a swap, option or future. Derivatives can be used to gain exposure to, or to help protect against, changes in the value of the underlying. See also embedded derivative and hedge.
Discount	(1) The amount that the early repayment cost of a loan is below its principal, or the price of a bond is below its nominal value. (2) To calculate the present value of an investment taking account of the time value of money.

Diversification	The spreading of risk across a variety of exposures in order to reduce the risk. For example, investing in a range of counterparties to limit credit risk or borrowing to a range of maturity dates to limit refinancing risk.
Dividend	Income paid to investors in shares and collective investment schemes. Dividends are not contractual, and the amount is therefore not known in advance.
DMO	Debt Management Office – an executive agency of HM Treasury that deals with central government’s debt and investments.
Duration	In relation to a bond or bond fund, the weighted average time of the future cash flows from today, usually expressed in years. The longer the duration, the more the price moves for a given change in interest rates.
Equity	(1) The residual value of an entity’s assets after deducting its liabilities. (2) An investment in the residual value of an entity, for example ordinary shares.
Fair value	IFRS term for the price that would be obtained by selling an investment, or paid to transfer debt, in a market transaction.
Fiscal policy	Measures taken by government to boost or slow the economy via taxation and spending decisions. Fiscal loosening or easing refers to cuts in taxes or increases in spending, while fiscal tightening refers to the opposite. See also monetary policy.
Financial institution	A bank, building society or credit union. Sometimes the term also includes insurance companies.
Financial instrument	IFRS term for investments, borrowing and other cash payable and receivable.
Forward deal	An arrangement where a loan or deposit is arranged in advance of the cash being transferred, with the advance period being longer than the standard period (if any) for such a transaction.
Fund manager	Regulated firm that manages collective investment schemes.
GDP	Gross domestic product – the value of the national aggregate production of goods and services in the economy. Increasing GDP is known as economic growth.

General Fund	A local Council reserve that holds the accumulated surplus or deficit on revenue income and expenditure, except on council housing.
Gilt	Bond issued by the UK Government, taking its name from the gilt-edged paper they were originally printed on.
Gilt yield	Yield on gilts. Commonly used as a measure of risk-free long-term interest rates in the UK.
Guarantee	An arrangement where a third party agrees to pay the contractual payments on a loan to the lender if the borrower defaults.
IFRS	International Financial Reporting Standards, the set of accounting rules in use by UK local authorities since 2010.
Interest	Compensation for the use of cash paid by borrowers to lenders on debt instruments.
Interest rate risk	The risk that unexpected changes in interest rates cause an unplanned loss, for example by increased payments on borrowing or lower income on investments.
Internal borrowing	A local government term for when actual “external” debt is below the capital financing requirement, indicating that difference has been borrowed from internal resources instead; in reality this is not a form of borrowing.
Investment strategy	A document required by investment guidance that sets out a local Council’s investment plans and parameters for the coming year. Sometimes forms part of the Council’s treasury management strategy.
Lease	A contract where one party permits another to make use of an asset in return for a series of payments. It is economically similar to buying the asset and borrowing a loan, and therefore leases are often counted as a type of debt.
Liquidity risk	The risk that cash will not be available to meet financial obligations, for example when investments cannot be recalled and new loans cannot be borrowed.
Loan	Contract where the lender provides a sum of money (the principal) to a borrower, who agrees to repay it in the future together with interest. Loans are not normally tradable on financial markets. There are specific definitions in government investment guidance.

Loans CFR	The capital financing requirement less the amount met by other long-term liabilities; i.e. the amount to be met by borrowing.
Local infrastructure rate	Discount on PWLB rates for new loans borrowed, available to local authorities that have been successful in a bidding round.
Long-term	Usually means longer than one year.
Market risk	The risk that movements in market variables will have an unexpected impact. Usually split into interest rate risk, price risk and foreign exchange risk.
Maturity	(1) The date when an investment or borrowing is scheduled to be repaid. (2) A type of loan where the principal is only repaid on the maturity date.
MHCLG	Ministry of Housing, Communities and Local Government – the central government department that oversees local authorities in England.
MiFID II	The second Markets in Financial Instruments Directive - a legislative framework instituted by the European Union to regulate financial markets in the bloc and improve protections for investors.
Monetary policy	Measures taken by central banks to boost or slow the economy, usually via changes in interest rates. Monetary easing refers to cuts in interest rates, making it cheaper for households and businesses to borrow and hence spend more, boosting the economy, while monetary tightening refers to the opposite.
Monetary Policy Committee (MPC)	Committee of the Bank of England responsible for implementing monetary policy in the UK by changing Bank Rate and quantitative easing with the aim of keeping CPI inflation at around 2%.
Money market fund (MMF)	A collective investment scheme which invests in a range of short-term assets providing high credit quality and high liquidity. Usually refers to CNAV and LVNAV funds with a WAM under 60 days which offer instant access, but the European Union definition extends to include cash plus funds.
Money markets	The markets for short-term finance, including deposits and T-bills. See also capital markets.

MRP	Minimum revenue provision - an annual amount that local authorities are required to set aside and charge to revenue for the repayment of debt associated with capital expenditure. Local authorities are required by law to have regard to government guidance on MRP.
Municipal bonds agency	Company that issues bonds in the capital market and lends the proceeds back to local authorities. The bonds are guaranteed by the local authorities.
Net borrowing	Borrowing minus treasury investments.
Operational boundary	A prudential indicator showing the most likely, prudent, estimated level of external debt, but not the worst-case scenario. Regular breaches of the operational boundary should prompt management action.
Option	A derivative where the holder pays a premium to have the right, but not the obligation, to buy or sell a security or enter into a defined transaction.
Outlook	A credit rating agency's expected direction of travel in the long-term rating over the next two years.
Pension Fund	Ring-fenced account for the income, expenditure and investments of the local government pension scheme. Pension fund investments are not considered to be part of treasury management.
Pooled fund	See collective investment scheme.
Premium	(1) The amount that the early repayment cost of a loan is above the principal, or the price of a bond is above its nominal value. See also discount. (2) The initial payment made under a derivative.
Price risk	The risk that unexpected changes in market prices lead to an unplanned loss. Managed by diversifying across a range of investments.
Principal	The amount of money originally lent on a debt instrument.
Private Finance Initiative (PFI)	A government scheme where a private company designs, builds, finances and operates assets on behalf of the public sector, in exchange for a series of payments, typically over 30 years. Counts as a credit arrangement and debt.
Professional client	MiFID II term for a client of a regulated firm that has a higher level of experience in financial markets than a retail client, and therefore needs a lower level of protection. Local

authorities may “opt up” to be treated as professional clients if they meet certain requirements.

Property fund	A collective investment scheme that mainly invests in property. Due to the costs of buying and selling property, including stamp duty land tax, there is usually a significant fee charged on initial investment, or a significant difference between the bid and offer price.
Prudential Code	Developed by CIPFA and introduced in April 2004 as a professional code of practice to support local Council capital investment planning within a clear, affordable, prudent and sustainable framework and in accordance with good professional practice. Local authorities are required by law to have regard to the Prudential Code.
Prudential indicators	Indicators required by the Prudential Code and determined by the local Council to define its capital expenditure and asset management framework. They are designed to support and record local decision making in a manner that is publicly accountable.
PWLB	Public Works Loans Board - a statutory body operating within the DMO that lends money from the National Loans Fund to local authorities and other prescribed bodies and collects the repayments. Not available in Northern Ireland.
Quantitative easing (QE)	Process by which central banks directly increase the quantity of money in the economy in order to promote GDP growth and prevent deflation. Normally achieved by the central bank buying government bonds in exchange for newly created money. Reversing QE by selling back bonds, or allowing them to mature without replacement, is sometimes called quantitative tightening.
Rating watch	A term used by credit rating agencies to indicate that a credit rating is under review, and that a change is likely within three months. The direction of potential change is usually indicated.
Recession	A period of economic slowdown. The technical definition is two consecutive quarters of negative GDP growth.
Redemption	The process of withdrawing cash from a collective investment scheme and cancelling the units of shares. Redemptions can be suspended in certain circumstances detailed in the prospectus.
Refinancing risk	The risk that maturing loans cannot, be refinanced, or only at higher than expected interest rates leading to an

	unplanned loss. Managed by maintaining a smooth maturity profile.
Registered Provider of Social Housing (RP)	An organisation that is registered to provide social housing, such as a housing
REIT	Real estate investment trust – a company whose main activity is owning investment property and is therefore similar to a property fund in many ways.
Revenue expenditure	Expenditure to meet the ongoing cost of delivering public services including salaries and the purchase of goods and services, as opposed to capital expenditure.
Ring-fencing	The process by which large UK banks have been split into retail banks and investment banks in order to promote financial stability.
RPI	Retail prices index - an older measure of inflation that tracks the prices of goods and services including mortgage interest and rent. Index-linked gilts are uprated using RPI. See also CPI.
Security	(1) A financial instrument that can be traded on a secondary market. (2) The concept of low credit risk. (3) Collateral.
Secured investment	An investment that is backed by collateral and is therefore normally lower credit risk and lower yielding than an equivalent unsecured investment.
Share	An equity investment, which usually also confers ownership and voting rights.
Short-term	Usually means less than one year.
Strategic funds	Collective investment schemes that are designed to be held for the long-term, comprising strategic bond funds, diversified income funds, equity funds and property funds.
Supported borrowing	Borrowing for which the repayment costs are supported by government grant.
Total return	The overall return on an investment, including interest, dividends, rent, fees and capital gains and losses. See also income return.

Treasury investments	Investments made for treasury management purposes, as opposed to commercial investments and service investments.
Treasury management	The management of an organisation's cash flows, investment and borrowing, with a particular focus on the identification, control and management of risk. Specifically excludes the management of pension fund investments.
Treasury management Advisor	Regulated firm providing advice on treasury management, capital finance and related issues.
Treasury Management Code (TM Code)	CIPFA's Code of Practice for Treasury Management in the Public Services and Cross-Sectoral Guidance Notes, to which local authorities are required by law to have regard.
Treasury management Indicators	Indicators required by the Treasury Management Code to assist in the management of credit risk, interest rate risk, refinancing risk and price risk.
Treasury management policy statement	Document required by the Treasury Management Code setting out a local Council's definition of and objectives for treasury management.
Treasury management practices (TMPs)	Document required by the Treasury Management Code setting out a local Council's detailed processes and procedures for treasury management.
Treasury management Strategy	Annual report required by the Treasury Management Code covering the local Council's treasury management plans for the forthcoming year.
Treasury management System	Computer programme for recording investments, borrowing, cash flow forecasts and market data to assist with treasury management operations.
Unit	The equivalent of a share in an authorised contractual scheme or unit trust.
Unit trust	A type of collective investment scheme that is structured as a trust, where investors buy units in the trust.
Unsupported borrowing	Borrowing where the cost is self-financed by the local Council. Sometimes called prudential borrowing since it was not permitted until the introduction of the Prudential Code in 2004. See also supported borrowing.
Usable reserves	Resources available to finance future revenue and/or capital expenditure. Some usable reserves are ring-fenced by law

for certain expenditure such as on schools or council housing.

Volatility	A measure of the variability of a price or index, usually expressed as the annualised standard deviation.
Working capital	The cash surplus or deficit arising from the timing differences between income/expenditure in accounting terms and receipts/payments in cash terms.
Yield	A measure of the return on an investment, especially a bond. The yield on a fixed rate bond moves inversely with its price.
Yield curve	A chart of yields or interest rates for similar instruments over a range of maturity dates.
